

Lieutenant Colonel

# Nefjoveny J. Rosa

## Product Manager

Artificial Intelligence Operations and Services

LTC Nefjoveny Rosa leads the Artificial Intelligence Operations and Services (AIOPS) Product Management Office under the Program Manager C2 Data and AI. He is responsible for overseeing AI Platform Services across Next Generation Command and Control. LTC Rosa also serves as Product Owner for Project Aria, Team Black, and the Army's Enterprise Model Repository. He oversees AI infrastructure and services available through the Army MI Cloud Computing Service Provider in support of Capability Program Executive Intelligence and Spectrum Warfare.

Prior to assuming his role as Product Manager for AIOPS, LTC Rosa served in a broad range of acquisition assignments, including Product Lead for Project Linchpin, Assistant Product Manager for the Army Intelligence Data Platform, Mission Contracting Deputy for the 918th Contracting Battalion, and Regional Contracting Office Chief in Jordan.

LTC Rosa also served as an Infantry Officer and held three company commands before transitioning to the Acquisition Corps. He deployed to Afghanistan three times in support of Operation Enduring Freedom and Operation Inherent Resolve.
